DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites a driver circuit. Such claim, consequently, is considered as a single means since the driver circuit does not seem to appear in combination with another recited element of means. Consequently, such claim is held nonenabling. See MPEP 2164.08 (a).

Allowable Subject Matter

2. Claim 1 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

3. Claims 2-10 are allowed.

4. The following is a statement of reasons for the indication of allowable subject matter: none of the prior art of the record discloses during a predetermined period indicated by the identification signal, the control section controls the drive section to output the differential signal according to the data signal, and during a period other than the predetermined period, the control section controls the drive section to put the output of the selection signal cable, or output a putting the output selection signal transceiver indicates selection of the electric predetermined a high impedance state, when the indicates selection of the optical differential signal, not the drive section in a high impedance state when the selection signal indicated selection of the optical transceiver.
